:

Warning

- 1. This Kyocera LCD module has been specifically designed for use only in electronic devices and industrial machines in the area of audio control, office automation, industrial control, home appliances, etc. The module should not be used in applications where the highest level of safety and reliability are required and module failure or malfunction of such module results in physical harm or loss of life, as well as enormous damage or loss. Such fields of applications include, without limitation, medical, aerospace, communications infrastructure, atomic energy control. Kyocera expressly disclaims any and all liability resulting in any way to the use of the module in such applications.
- 2. Customer agrees to indemnify, defend and hold Kyocera harmless from and against any and all actions, claims, damages, liabilities, awards, costs, and expenses, including legal expenses, resulting from or arising out of Customer's use, or sale for use, or Kyocera modules in applications.

Caution

1. Kyocera shall have the right, which Customer hereby acknowledges, to immediately scrap or destroy tooling for Kyocera modules for which no Purchase Orders have been received from the Customer in a two-year period.

1. Application

This document defines the specification of TCG070WVLR*PC*-GD*118. (RoHS Compliant)

2. Construction and outline

LCD : Transmissive color dot matrix type TFT

Backlight system : LED

Polarizer : Glare treatment

LCD Interface : LVDS

Additional circuit : Timing controller, Power supply (3.3V input)

With Constant current circuit for LED Backlight

Touch panel : Projected capacitive touch panel
Touch panel Interface : USB(Equipped Touch panel IC)
Surface film : Anti-Glare Anti-finger print treatment

3. Mechanical specifications

Item	Specification	Unit
Outline dimensions 1)	169.8(W)×109.7(H)×(9.2)(D)	mm
Active area (LCD)	152.4(W)×91.44(H) (17.8cm/7.0 inch(Diagonal))	mm
Active area (Touch panel)	152.4(W)×91.44(H)	mm
Dot format	800×(R,G,B)(W)×480(H)	dot
Dot pitch	0.0635(W)×0.1905(H)	mm
Base color 2)	Normally Black	-
Surface hardness 3)	3Н	-
Mass	(260)	g

- 1) Projection not included. Please refer to outline for details.
- 2) Due to the characteristics of the LCD material, the color varies with environmental temperature.
- 3) Conforms to JIS K54000 8-4

\mathbf{S}	pec No.	Part No.	Page
Т	Q3C-8EAF0-E1YAA152-01	TCG070WVLR*PC*-GD*118	2

4. Absolute maximum ratings

4-1. Electrical absolute maximum ratings

Item		Symbol	Min.	Max.	Unit
Supply voltage(+3.3V)		$V_{ m DD}$	-0.3	4.0	V
Supply volta	ge(+12V)	$V_{\rm IN}$	-0.3	14.0	V
	RxINi+, RxINi- 1)	V_{I1}	-0.3	2.8	V
Input signal	CK IN+, CK IN-	V_{I2}	-0.3	2.8	V
voltage 2)	SELLVDS, BITSEL, SC	V_{I3}	-0.3	V _{DD} +0.5	V
	BLBRT, BLEN	V_{I4}	-0.3	V_{IN}	V
Supply voltage for touch panel		V_{TP}	-0.3	(5.25)	V

- 1) i=0,1,2,3
- 2) V_{DD} must be supplied correctly within the range described in 5-1.

4-2. Environmental absolute maximum ratings

Item		Symbol	Min.	Max.	Unit
Operating temperature	1)	Тор	-20	70	$^{\circ}\mathrm{C}$
Storage temperature	2)	T_{STO}	-30	80	$^{\circ}\mathrm{C}$
Operating humidity	3)	Нор	10	4)	%RH
Storage humidity	3)	Hsto	10	4)	%RH
Vibration		-	5)	5)	-
Shock		-	6)	6)	-

- 1) Operating temperature means a temperature which operation shall be guaranteed. Since display performance is evaluated at 25°C, another temperature range should be confirmed.
- 2) Temp. = -30° C < 48h , Temp. = 80° C < 168h

Store LCD at normal temperature/humidity. Keep them free from vibration and shock. An LCD that is kept at a low or a high temperature for a long time can be defective due to other conditions, even if the low or high temperature satisfies the standard.

(Please refer to "Precautions for Use" for details.)

- 4) Non-condensing
- 5) Temp. ≤ 40°C, 85%RH Max.

Temp. > 40°C, Absolute humidity shall be less than 85%RH at 40°C.

5)

Frequency	10∼55 Hz	Acceleration value
Vibration width	0.15mm	$(0.3\sim 9 \text{ m/s}^2)$
Interval	10-55-10	Hz 1 minutes

2 hours in each direction X, Y, Z (6 hours total) EIAJ ED-2531

6) Acceleration: 490 m/s², Pulse width: 11 ms

3 times in each direction: $\pm X$, $\pm Y$, $\pm Z$

EIAJ ED-2531

BLEN Input pull-down resistance	R _{IN_BLEN}	-	100	300	500	$k\Omega$
PWM Frequency 3)	fрwм	-	200	-	10k	Hz
		f _{PWM} =200Hz	1	-	100	%
PWM Duty ratio 3)	D_{PWM}	f _{PWM} =2kHz	10	-	100	%
		f _{PWM} =10kHz	50	-	100	%
Operating life time 4), 5)	Т	Temp.=25°C	-	100,000	-	h

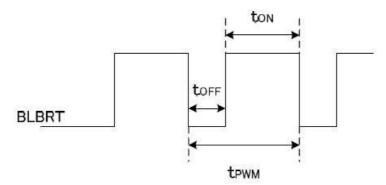

1) V_{IN}-turn-on conditions

Spec No.	Part No.	Page
TQ3C-8EAF0-E1YAA152-01	TCG070WVLR*PC*-GD*118	6

- 2) $V_{IN} = 12V$, Temp. = 25°C, $D_{PWM} = 100\%$
- 3) PWM Timing Diagram

ton, toff $\geq 50 \,\mu$ s.

In case of lower frequency, the deterioration of the display quality, flicker etc., may occur.

- 4) When brightness decrease 50% of minimum brightness.

 The average life of a LED will decrease when the LCD is operating at higher temperatures.
- 5) Life time is estimated data. (Condition: IF=60mA, Ta=25°C in chamber).

5-3. Touch panel

Item	Symbol	Condition	Min.	Тур.	Max.	Unit
Supply voltage	$ m V_{TP}$	_	(4.75)	(5.0)	(5.25)	V
Current consumption	${ m I}_{ m TP}$	1)	_	(40)	(52)	mA
1	V_{TPSL}	"Low" level	(-0.3)	_	$(0.3V_{TP})$	V
Input signal voltage 2)	V_{TPSH}	"High" level	$(0.7V_{\mathrm{TP}})$	_	$(V_{TP}+0.3)$	V

1) Condition: $V_{TP}=5.0V$

Temp. = 25° C, 2 point touch

2) Accommodation: D-, D+

Spec No.	Part No.	Page
TQ3C-8EAF0-E1YAA152-01	TCG070WVLR*PC*-GD*118	7

6. Specification of function

Item	Description	Note
Resolution	800×480	-
Starting point	upper left	1)
Input 2)	finger	-
Recommended touch sensor area	φ10.0 mm	-
Number of touch point	2 point	-
Linearity	less than ± 2.0 mm	3) 4)
Interface	USB	-
os	Windows 7, Linux, Android	-

- 1) Please refer to outline drawing in details.
- 2) As for input with gloves, separate discussion for feasibility is needed.
- 3) Performance of linearity is under the environment of no noise.
- 4) Linearity is not guaranteed. It is for reference only.
- 5) Structure which has common GND for touch panel and LCD is recommended.

Spec No.	Part No.	Page
TQ3C-8EAF0-E1YAA152-01	TCG070WVLR*PC*-GD*118	8

7. Optical characteristics

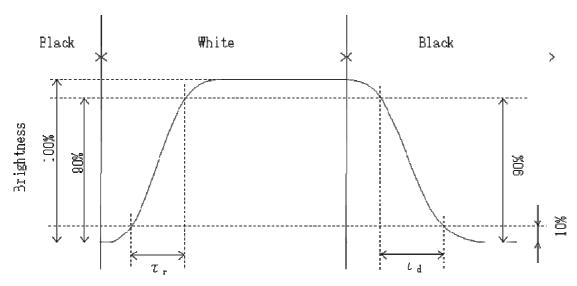

Measuring spot = ϕ 6.0mm, Temp. = 25°C

					. 0.1		. <u>1</u>
Item		Symbol	Condition	Min.	Тур.	Max.	Unit
D	Rise	τr	$\theta = \phi = 0^{\circ}$	-	(18)	-	ms

1	V_{TP}	Supply voltage(+5.0V)	1
2	D-	USBDM	-
3	D+	USBDP	-
4	NC	No connect	-
5	GND	GND	-

1) Please contact to us for the detail such as timing.

Touch panel connector : DF57H-5P-1.2V (HIROSE)
Matching connector : DF57H-5S-1.2C (HIROSE)

Spec No.	Part No.	Page
TQ3C-8EAF0-E1YAA152-01	TCG070WVLR*PC*-GD*118	19

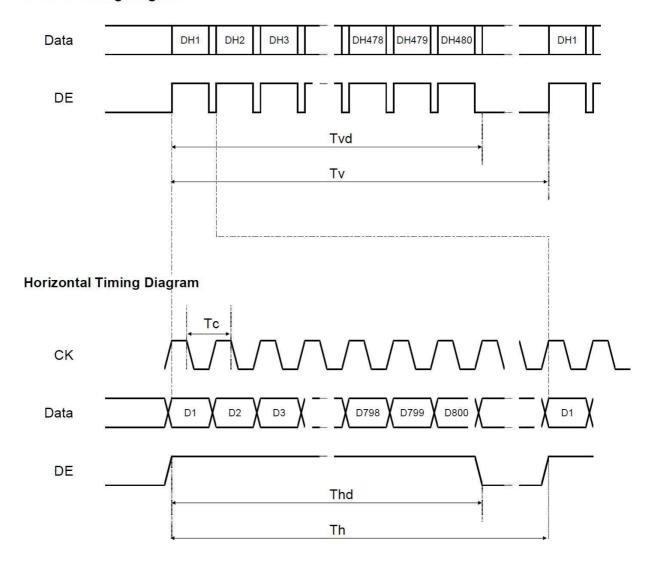

9. Input timing characteristics

9-1. Timing characteristics

	Item	Symbol	Min.	Typ.	Max.	Unit	Note
Clock (CK)	Frequency	1/Tc	29.88	33.20	36.52	MHz	
	II 1 D 1	Th	1,024	1,056	1,088	Тс	
Enable signal (DE)	Horizontal Period		-	31.8	-	μ s	1)
	Horizontal display period	Thd		800		Тс	
(DL)	Vertical Period	Tv	487	525	550	Th	
	Vertical display period	Tvd		480		Th	
Refresh rate		fv	50	60	70	Hz	2)

- 1) Please set a clock frequency, a vertical dormant period, and the horizontal dormant period so that the Horizontal Period should not reach less than Min. value.
- 2) If the refresh rate reach less than Min. value, the deterioration of the display quality, flicker etc., may occur.(fv=1/Tv)

TQ3C-8EAF0-E1YAA152-01	TCG070WVLR*PC*-GD*118	21

10. Lot number identification

The lot number shall be indicated on the back of the backlight case of each LCD.

No1. - No5. above indicate

- 1. Year code
- 2. Month code
- 3. Date
- 4. Version Number
- 5. Country of origin (Japan or China)

Year	2014	2015	2016	2017	2018	2019
Code	4	5	6	7	8	9

Month	Jan.	Feb.	Mar.	Apr.	May	Jun.
Code	1	2	3	4	5	6

Month	Jul.	Aug.	Sep.	Oct.	Nov.	Dec.
Code	7	8	9	X	Y	Z

11. Warranty

11-1. Incoming inspection

Please inspect the LCD within one month after your receipt.

11-2. Production warranty

Kyocera warrants its LCD's for a period of 12 months from the ship date. Kyocera shall, by mutual agreement, replace or re-work defective LCD's that are shown to be Kyocera's responsibility.

Spec No.	Part No.	Page
TQ3C-8EAF0-E1YAA152-01	TCG070WVLR*PC*-GD*118	22

12. Precautions for use

12-1. Installation of the LCD

- 1) The product shall be installed so that there is no pressure on the LSI chips.
- 2) When LCD is installed, power shall be put off. Same applies to plug in/out of FFC/FPC/Cable.
- 3) When handling connector, please do not make any excessive pressure than needed. It may damage the LCD.
- 4) Since this product is wide viewing product, occurrence level of in-plane unevenness by the external stress is different compared to current normal viewing product. So there is a possibility that in-plane unevenness will be occurred by over twist, strain giving by attaching to LCD, and over pressure to touch panel. Please be careful of stress when designing the housing.
- 5) A transparent protection sheet is attached to the touch panel. Please remove the protection film slowly before use, paying attention to static electricity.
- 6) Touch location is detected by the change of capacitance. Therefore, if there is any factor close to LCD which may change electric field, malfunction may be caused as it may give adverse effect on coordinate detecting mechanism.
- 7) When designing your case, using material composed with insulating resin is recommended for bezel of touch panel. When metal plate is used, malfunction may be caused by the occurrence of capacitance coupling on the periphery of active area.
- 8) The Bezel on the upper part of Touch-Panel recommends using the material which consists of "Insulating Resin", when designing the housing. Otherwise, Malfunction may be caused by occurring "capacitive coupling with sheet metal" in the perimeter part of active area if sheet metal is used.

12-2. Static electricity

- 1) Since CMOS ICs are mounted directly onto the LCD glass, protection from static electricity is required.
- 2) Workers should use body grounding. Operator should wear ground straps.

12-3. LCD operation

- 1) The product shall be operated within the limits specified. Operation at values outside of these limits may shorten life, and/or harm display images.
- 2) This product shall be operated in the atmosphere free from high temperature, high humidity, condensation and chemical atmospheres such as salt, acid and alkaline, which may cause gas corrosion, in order to prevent damage of this product and electrification.
- 3) Please select the best display pattern based on your evaluation because flicker, lines or nonuniformity or unevenness can be visible depending on display patterns.
- 4) There is possibility to cause malfunction by using the touch panel with droplets or conductive this product on the surface of touch panel, please design the software with having discussion between both companies.
- 5) It is simulated that input for this product will be done by fingers. Please let us know if the input will be done except by fingers since it needs to change the setting.

12-4. Storage

- 1) The product shall be stored within the temperature and humidity limits specified. Store in a dark area, and protect the product from direct sunlight or fluorescent light.
- 2) Always store the product so that it is free from external pressure onto it.
- 3) Please store the product board in a location that is free of dust, corrosive elements, or environmental gas (such as acid and alkali salts).

12-5. Usage

1) <u>DO NOT</u> store in a high humidity environment for extended periods. Polarizer degradation bubbles, and/or peeling off of the polarizer may result.

Spec No.	Part No.	Page
TQ3C-8EAF0-E1YAA152-01	TCG070WVLR*PC*-GD*118	23

- 2) Do not push or rub the panel's surface with hard to sharp objects such as knives, or the touch panel may be scratched.
- 3) In case a surface of touch panel gets dirty, please wipe gently with soft cotton by soaking in a neutral detergent or small amount of ethyl alcohol. Please exercise caution in when handling hazardous chemicals.
- 4) The product is made of glass. It may break when dropped, or vibrated excessively. Usually there is a film on the surface of the glass which would prevent broken glass from scattering, but nevertheless handle it carefully during assembly and treat it gently during use. Please take extra caution to the edge due to less strength than surface can cause glass to break.
- 5) Please implement protective countermeasures against high voltage surges such as lightning strikes. Damaged may be caused by abnormal voltage.
- 6) The product is not designed as anti-radiation product.
- 7) Always keep the product free from condensation during testing. Condensation may permanently spot or stain the polarizer and film.
- 8) Do not make over circuit board because it will result in damage.
- 9) This product has been specifically designed for use in general electronic devices, but not for use in a special environment such as usage in an active gas. Hence, when the product is supposed to be used in a special environment, evaluate the product thoroughly beforehand and do not expose the product to chemicals such as an active gas.
- 10) Please do not use solid-base image pattern for long hours because a temporary afterimage may appear. We recommend using screen saver etc. in cases where a solid-base image pattern must be used.
- 11) Liquid crystal may leak when the product is broken. Be careful not to let the fluid go into your eyes and mouth. In the case the fluid touches your body; rinse it off right away with water and soap.

13. Reliability test data

Test item	Test condition	Test time	Jud	gement
High temp. atmosphere	80°C	(240h)	Display function Display quality Current consumption	: No defect : No defect : No defect
Low temp. atmosphere	-30°C	(240h)	Display function Display quality Current consumption	: No defect : No defect : No defect
High temp. humidity atmosphere	40°C 90% RH	(240h)	Display function Display quality Current consumption	: No defect : No defect : No defect
Temp. cycle	-30°C 0.5h R.T. 0.5h 80°C 0.5h	(10cycles)	Display function Display quality Current consumption	: No defect : No defect : No defect
High temp. operation	70°C	(500h)	Display function Display quality Current consumption	: No defect : No defect : No defect

- 1) For shelf test (including temperature cycling), after leaving this LCD for predefined time under each environment, leaving back to room temperature and make measurement after 2 hours.
- 2) Under each operating test for touch panel, after leaving touch panel conducting with 5.0V or 3.3V under each environment (without pushing touch panel active area), leaving back to room temperature and make measurement after 2 hours.
- 3) Each test item uses a test only once. The tested LCD is not used in any other tests.
- 4) The LCD is tested in circumstances in which there is no condensation.
- 5) The reliability test is not an out-going inspection.
- 6) The result of the reliability test is for your reference purpose only.

 The reliability test is conducted only to examine the LCD's capability.
